Lab #4
Matthew Langlois - 7731813
Nov. 2, 2017

# Part A

Procedure

1) Open the application using the command `python3 lab4a.py`

2) The slider will allow you to adjust the threshold for the hue showing different values

Output

Here are some screenshots of the output:

Part B

Procedure

1) Open the application using the command `python3 lab4b.py`

2) The slider will allow you to adjust which color you're isolating (yellow-green, violet, red).

Output

Here are some screenshots of the output:
